Objective

Motivated graduate aiming for a System Engineer role to build practical skills in IT support, system maintenance, and network management

Experience

Rasi LED *2026/04 - 1/07/2026*
Sales Executive

1. Resolved complex hardware/software
2. satisfaction rate, cutting resolution

Scope tech software solutions *2025/12 - 2026/03*
Full Stack solutions

1. Developed & deployed 3 production-grade web applications
2. Built RESTful microservices architecture AP

Hindustan power links *09.2024 - 09.2025*
Business marketing executive

Maintained 85% customer satisfaction score with 80% daily activity rate & follow-ups
Introduction to FMGC product

Shiash Info tech solutions *2023/09 - 2024/03*
Python Full stack

1. Developed & deployed 3 production-grade web applications

2. Built RESTful microservices architecture AP

Akash Byju'S *2023/05 - 2023/08*
Business development associate

1. Converted 40+ enrollments/month through consultative counseling, improving student retention
2. Maintained 85% customer satisfaction score with 80% daily activity rate on calls & follow-ups

Skills

TECHNICAL SKILLS : Java | 1.Frontend: React.js, HTML5, CSS3,JavaScript | Back End: Node Js | 3. Data base : My SQL | 4.Tools: Git, GitHub, IntelliJ, VS Code,

SOFT SKILLS : 1.Communication 2.Problem solving

Education

St.Mother Theresa engineering college
Computer engineering *2023*
81

Samy Ayya Nadar Higher secondary school
Biology *2019*
63

Certification

1.TN Skill corporation
PROGRAM; Junior software developer

2.Let's Upgrade
PROGRAM: Python three days Workshop PROGRAM

3.Besant technology
Program :
One Java training program

Project

1.BOOKEASY –BOOKING MANAGEMENT SYSTEM
Tech Stack: React.js, Spring Boot, MySQL

1. Architected and developed end-to-end booking platform with 3 user roles (Admin, Vendor, Customer) and core features including real-time slot availability, dynamic pricing, and cancellation management
2. Built 8 independent microservices using Spring Boot communicating via REST APIs, deployed using containers with uptime for daily active user
3. Designed normalized MySQL schema with 18 tables, triggers, and stored procedures handling bookings payments

2.BOUNTY PREDICTION SYSTEM – ML POWERED ANALYTICS
Tech Stack: Python, Streamlit, Scikit-learn, NumPy, Pandas,
1. Engineered machine learning model using Linear Regression and Random Forest to predict bounty values with accuracy on test dataset of historical records
2.Performed data cleaning, preprocessing, and feature engineering to identify 12 key predictors from raw data, improving model accuracy
3. Built interactive Streamlit web application

3.ADD DEMAND PREDICTION SYSTEM
Tech Stack: Python, Streamlit, NumPy, Pandas

1. Developed time-series forecasting model using ARIMA and Exponential Smoothing to predict produce demand for next 6 months with accuracy
2. Analyzed sales data containing records to identify seasonality patterns, trends, and external demand factors
3. Created multi-page Streamlit dashboard with interactive charts, filters for product category, region and time period, used by business team for inventory planning
4. Automated weekly report generation and email delivery
